MIW® Oil / Air Filters

Your trusted engine partner

JAPANESE TECHNOLOGY

Developed in Shizuoka, Japan for use with EOM applications and after market performance, replacement parts. MIW brand uses "Multi Stage Filtration" to ensure the removal of all hazardous particles and impurities from the engine oil. Incorporating an oil pressure stabilizer system, to provide a smooth flow of cleaner and more refined oil to the engine. The same meticulous detail is given to the quality air filter components.

Protection of your engine is guaranteed with MIW oil and air filters.

STATE OF THE ART QUALITY

MIW oil filters are produced with a vision to provide the highest standards required by modern motorcycles. Our chosen method of filtration is resin impregnated micropore paper. Using a high grade cotton linter fibre, to give unparalleled durability during filtration. The cotton linter element composes of fibre strands, with differing thicknesses. With thicker strands on the outer wall of the filter, to catch larger metallic particles and thinner strands making up the inner wall, catching even the smallest particles. The multi strand microscopic fibers provide superb porosity for oil flow, even after contamination.

FULL RANGE FOR AN OPTIMAL MARKET COVERAGE

The MIW brand (Also known as Meiwa Company Ltd) has been a leader in filter technology from the early 1970's and one of the world most appreciated oil and air filter product lines for motorcycles. Today MIW becomes stronger than ever with a new range for all popular motorcycles, with oil and air filtration. To choose MIW as your filtration partner, is to choose one of the most experience brands in the filtration application field.
